

White Medical Co., Ltd.

# White Medical is creating the future of ophthalmology

Since our founding in 1997, White Medical's corporate philosophy has been the realization of high-quality, advanced ophthalmic care. Keeping a close and constant eye on the state-of-the-art in medical treatment, we import sophisticated products of the highest quality from the U.S., Europe, Canada, and other countries, to offer a broad selection of medical devices. By providing high-quality, easy-to-use, and outstanding products, White Medical aims to benefit and serve society.

In light of the country's rapidly aging population, the number of people in Japan with diseases of the eye is expected to increase. At the same time, Japanese have high expectations for safe, secure medical care, which is vital for modern medicine. For this reason, we will do our best to provide better service by offering high quality products, responding rapidly to constantly changing needs, and enhancing our teamwork across the company.

Looking to the future, White Medical is committed to working as a unified company to ensure that its brand continues to be recognized by its many customers as a guarantee of quality. Thank you very much for your continued support.
